

EZBET PROJECT

EZBET Project is an academic initiative in the frame of cooperation between the University of Stuttgart and Ain Shams University. It is fully supported and financed by the DAAD programme (Universities partnership). The Project’s academic backbone is the department of International Urbanism at Städtebau Institut (SI).
The novelty of the project lies in its aim to provide the basic urban and social facilities in the informal areas of Cairo through engaging three primary stakeholders in all its activities and development phases:

- 1. Inter-disciplinary students, professors, researchers, and academic staff,
- 2. The Ezbetis (Informal areas) residents who are the direct beneficiaries of the project and its future owners,
- 3. Entities, including the government and local non-governmental organizations (NGOs) as well as other civil society organizations.

EZBET aims to develop and create a prototype model for real sustainable community development to be the seed for more development projects in other informal settlements in Egypt. The project aims to impact the local individuals intellectually and economically along with influencing the whole Ezbet’s built environment and infrastructure.

VISION
Improve LIFE...together with the PLACE.

MISSION
Upgrade the urban and social fabric without changing its logic, culture and identity

EZBET INTERNATIONAL EXHIBITION 2018 STUTTGART

We are pleased to present our five years of successful work in the informal settlements of Cairo. Our opening ceremony includes a panel discussion with our honorable guest Prof. Anupama Kundoo who will provide a fruitful debate about the topic Human Scale in different contexts.

The exhibition displays EZBET innovative way of community development in informal settlements through its participatory approaches and multi-disciplinarily. Along with an outdoor simulated entertaining exhibition, workshops will take place about the topics of “participation” and “bottom-up approaches”.
An innovative goal of the EZBET project is to provide informal settlements with a necessary basis of urban and social institutions in intercultural and interdisciplinary exchange. Our vision is to improve LIFE together with the PLACE.
